

Exhibit 6.

Maps Describing the Layout Configuration of Residential Dwellings Located Proximate to the Accident Site³⁰⁰

Contents (component maps, commencing, in sequence, on the following page)

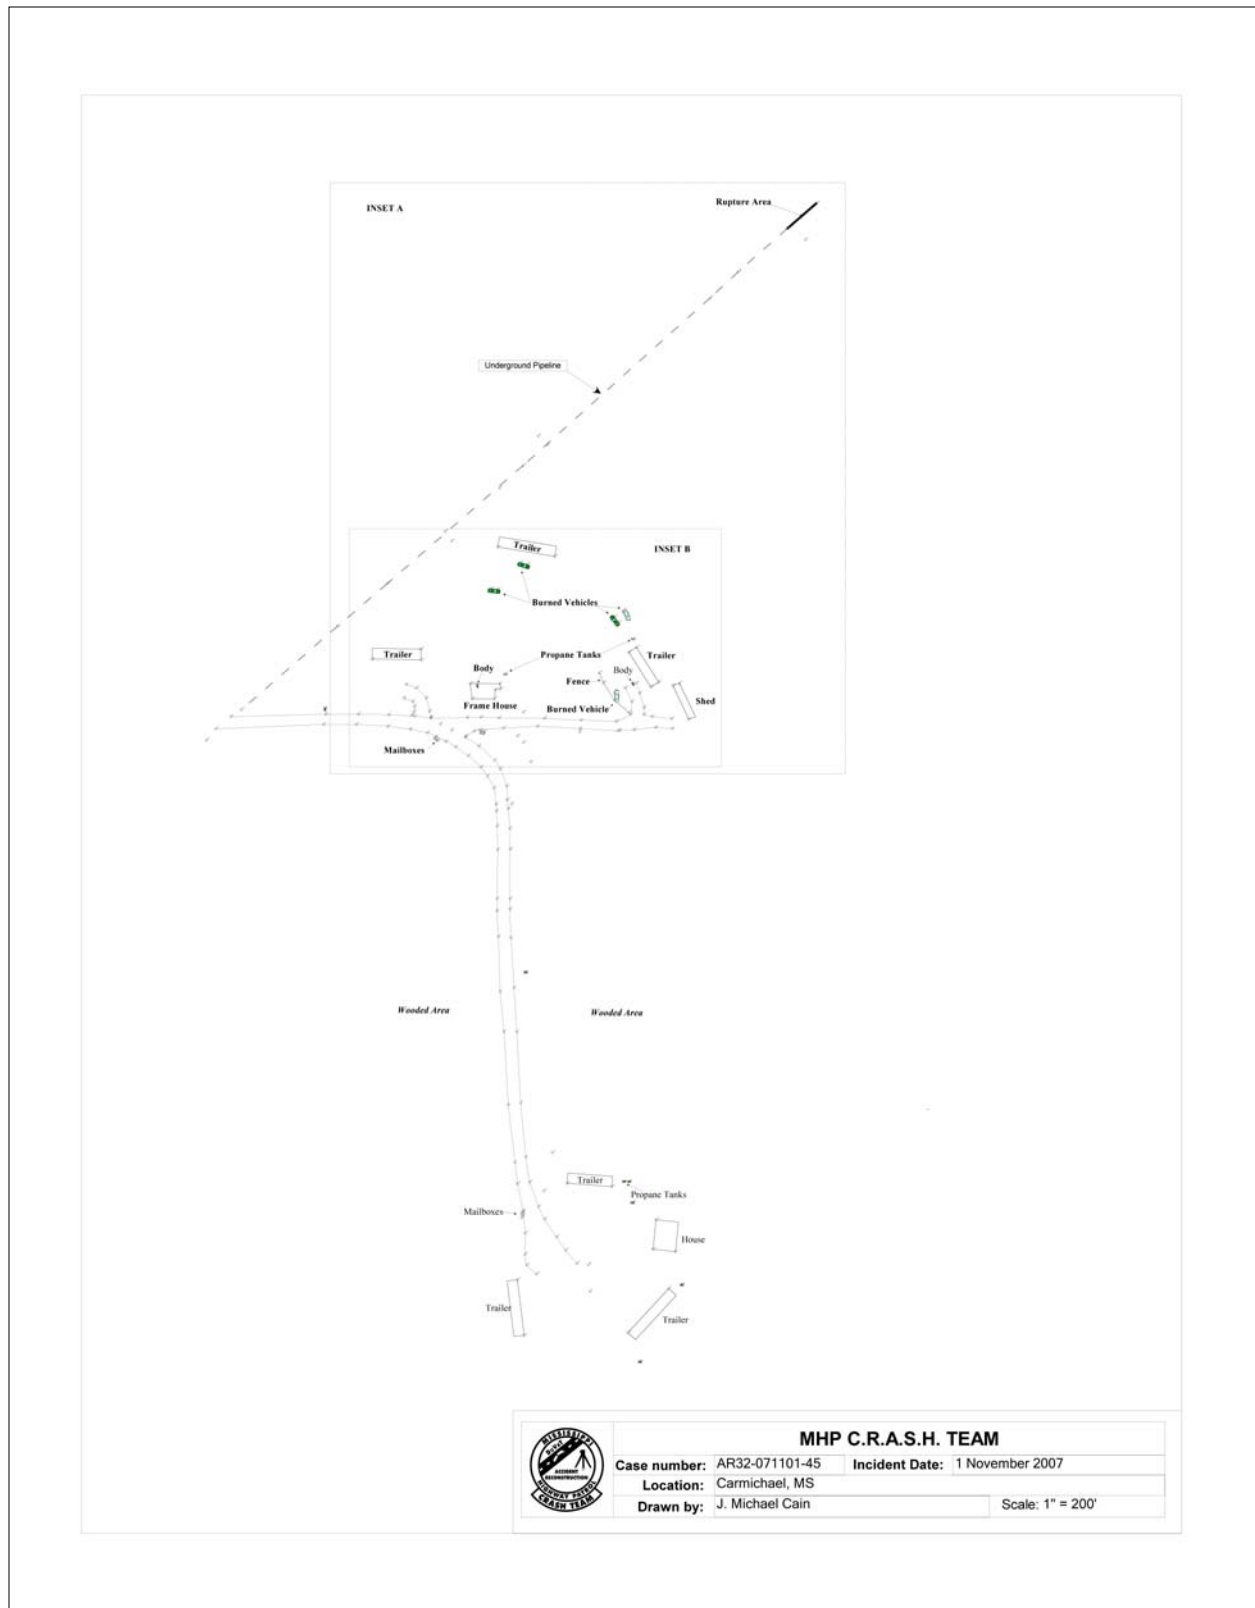

1. Overall Site (describing the entire affected area, encompassing both the ‘cluster of six residential dwellings’ and the ‘cluster of five residential dwellings’ at the site)
2. Inset A (describes the location of the pipeline and major affected area, which also shows, in detail, the area of the ‘cluster of six residential dwellings’ at the site)
3. Inset B (describes further detail of inset A, depicting the location configuration of the four burned-out residential dwellings and vehicles, and fatalities)

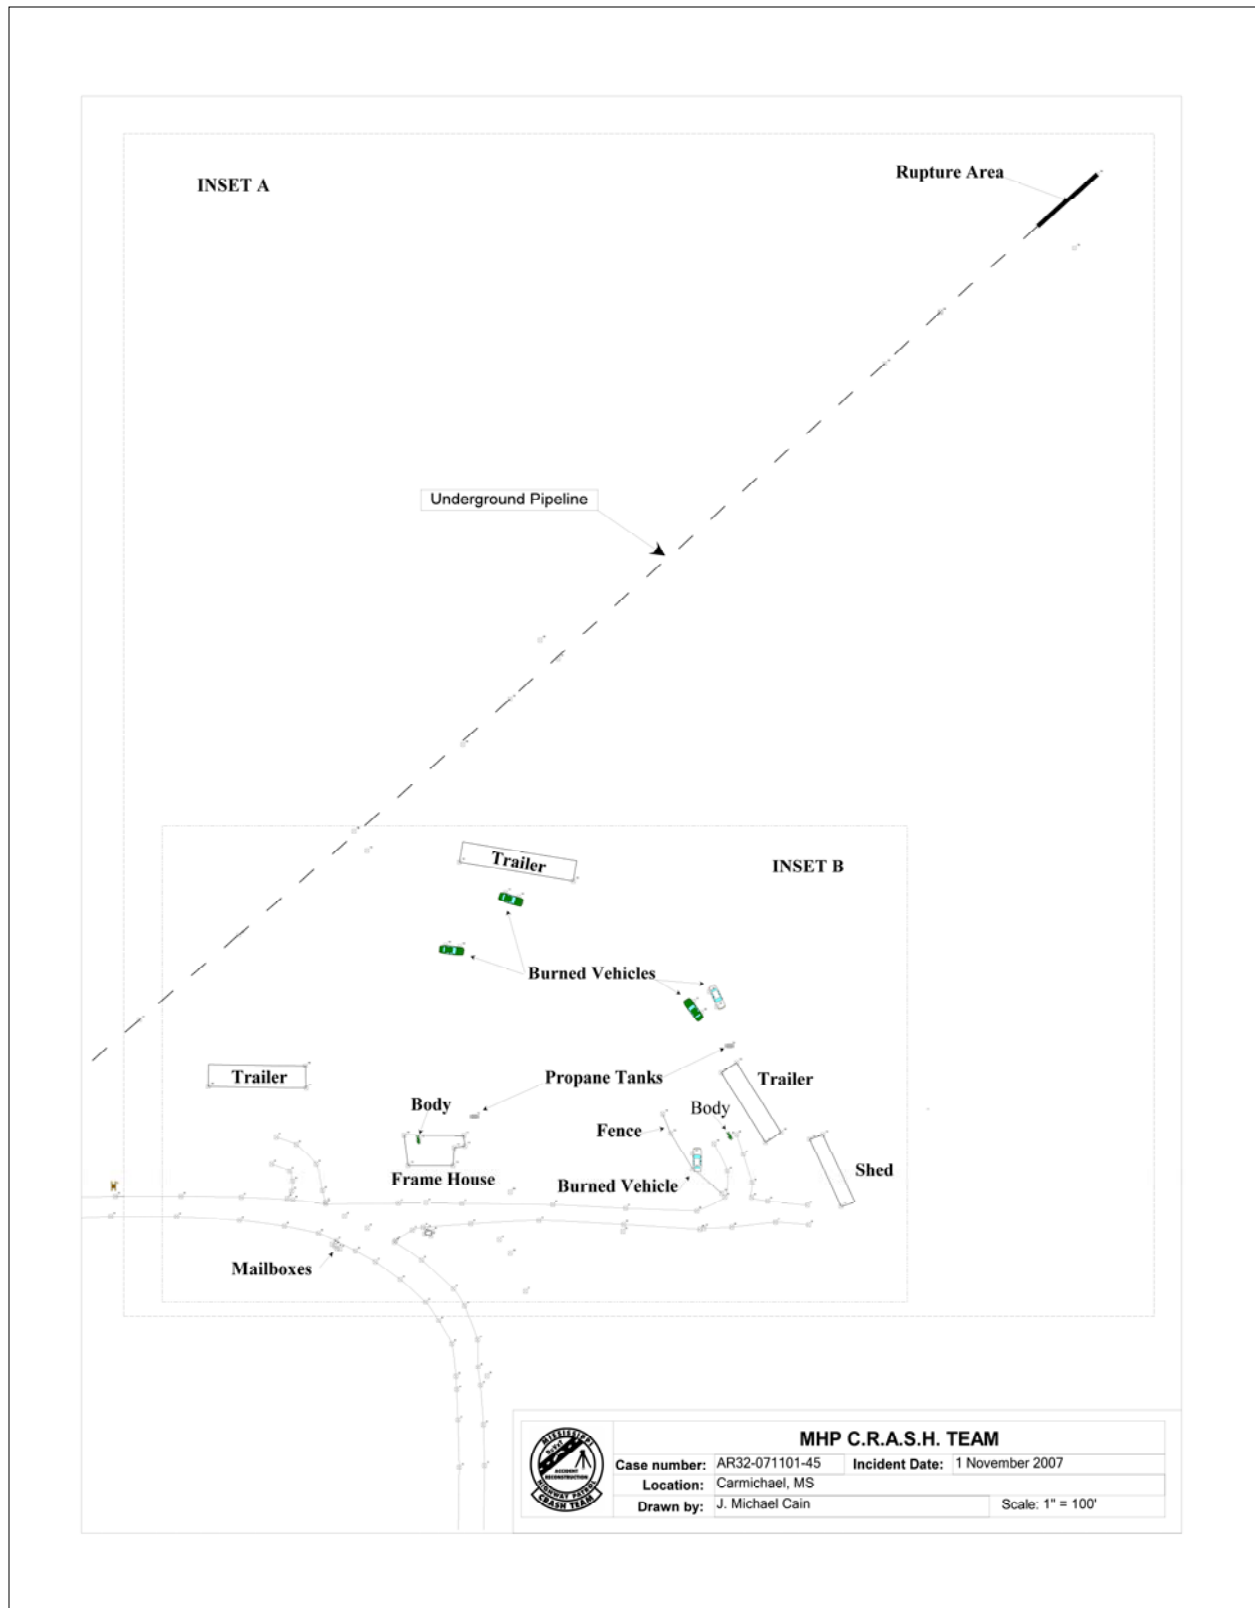

Notes

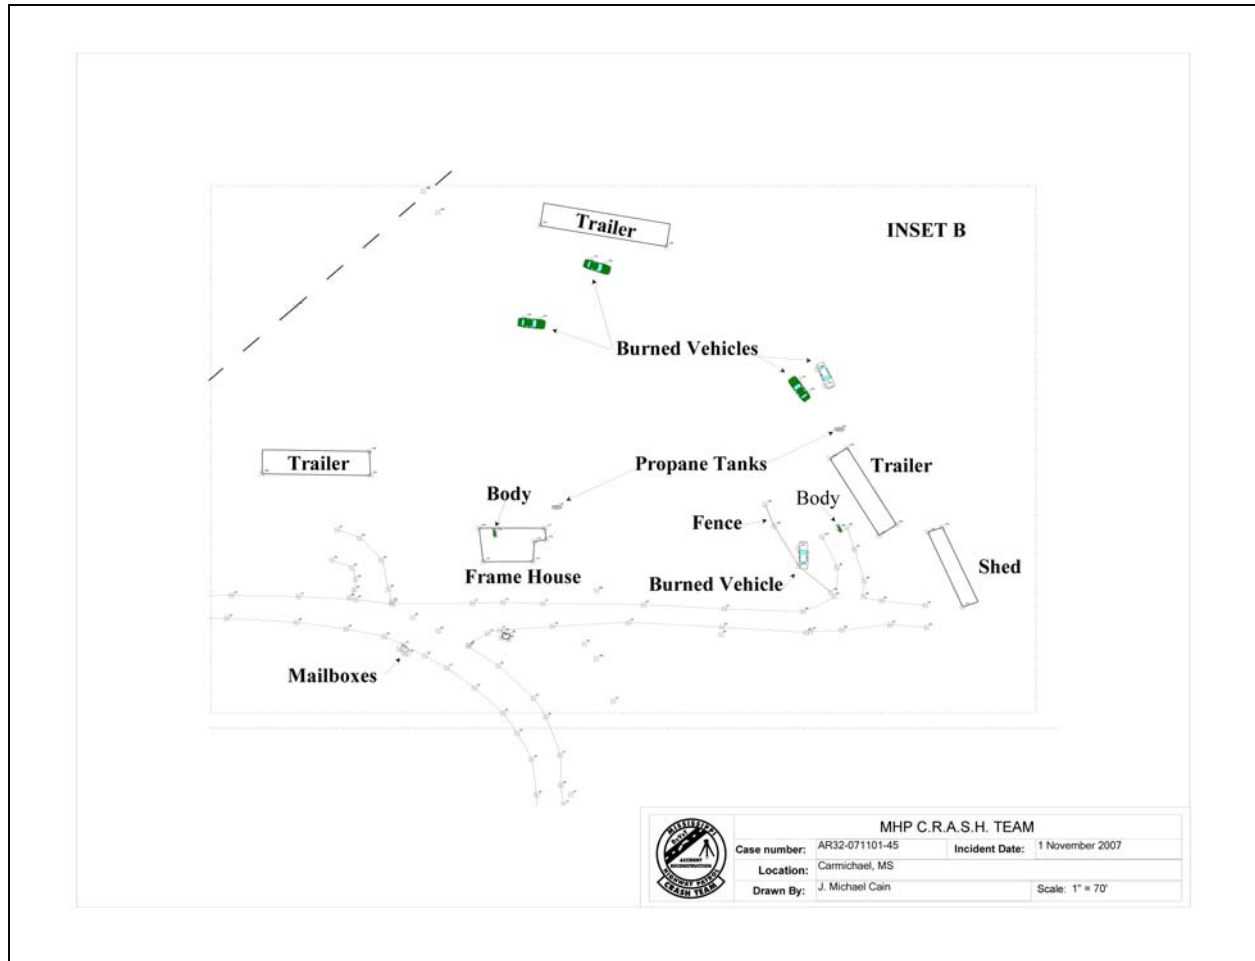

- not all of the residential dwelling structures involved in the accident are cited in the maps³⁰¹.
- maps are drawn to scale, but have been photo-reduced to fit on these pages.

³⁰⁰ source: Mississippi Highway Patrol / C.R.A.S.H Team, site survey diagrams (ref. § 5.4.1.b.)

³⁰¹ several residential dwellings, which were relatively undamaged, are not included in this map series
